

Dansac X-tra Strips

Preserving confidence one strip at a time.

For those seeking extra protection around the edge of their ostomy skin barrier, Dansac X-tra strips are a flexible new option. Designed to easily fit uneven body shapes and contours, they provide enhanced comfort and security—while helping prolong wear time. More than just leak prevention, Dansac X-tra strips deliver the added confidence and reassurance your patients deserve.

Great fit

- > New three-piece design allows custom-shaped fit around edges of any skin barrier
- > Wider size accommodates more body types, folds and creases

Extra security

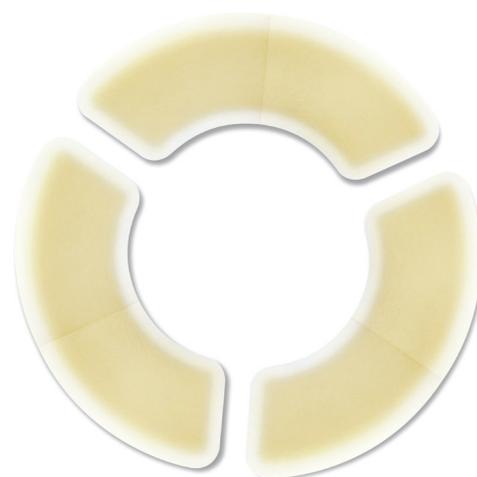

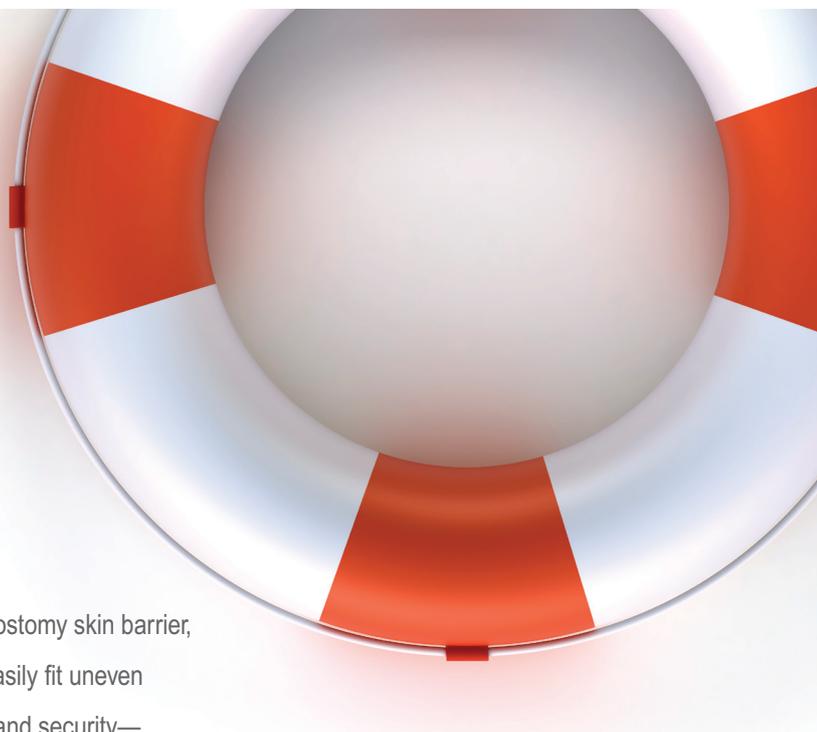

- > Skin-friendly hydrocolloid formulation conforms to uneven skin contours for more secure seal
- > Prolonged wear time delivers added protection against leakage

Designed for comfort + convenience

- > Soft and elastic water-resistant material provides more flexibility of movement and ease-of-use, even for those with limited dexterity
- > Transparent tray allows easy transportation and hygienic storage
